The (final) Termsheet will be made available upon fixing the indicative terms on the later of (i) the end of the subscription period (if any) and (ii) Valuation Date (0).

This Termsheet is available exclusively in English.

The product described in this document ("Notes") does not constitute a participation in a collective investment scheme within the meaning of the Swiss Federal Act on Collective Investment Schemes ("CISA"). Therefore, the Notes are not subject to authorization and supervision by the Swiss Financial Market Supervisory Authority FINMA ("FINMA"), and investors in the Notes will not benefit from protection under the CISA or supervision by FINMA. Investors in the Notes bear a credit risk on the Issuer and ultimately on the Guarantor.

This Termsheet does neither constitute a prospectus or similar communication pursuant to the Swiss Financial Services Act, as amended ("FinSA") nor the final terms with respect to the Notes and has not been reviewed or approved by or filed with a review body pursuant to article 52 of the FinSA. This document is of summary nature only and may be considered to be marketing material.

The Notes are not Specified Notes for purposes of the Section 871(m) of the U.S. Internal Revenue Code of 1986.

1. PRODUCT DESCRIPTION

OVERVIEW

This is a product for investors who expect the value of the Underlyings to remain stable or to increase slightly. Every year (on each Instalment Date and on the Maturity Date), the Issuer shall pay to the Noteholders a partial redemption amount (each an Installment Amount and the Final Redemption Amount) equal to 9.50%.

In addition to that, the product offers investors a yearly conditional coupon equal to 2.50%(*) p.a. as further set out herein, subject to the performance of the Underlyings. On each Interest Payment Date, investors will be paid such a coupon if the worst performance as of the Valuation Date immediately preceding the relevant Interest Payment Date is higher than or equal to 0%. The coupon is paid on 100% of the Specified Denomination. Each relevant performance is equal to the difference of the closing prices as of (i) such Valuation Date immediately preceding the relevant Interest Payment Date and (ii) the Valuation Date(0) (such difference being expressed as a percentage of the closing price as of the Valuation Date(0), and being negative if between the first and the relevant subsequent Valuation Date, the closing price decreases). In addition, investors benefit from a recovery mechanism: if due to the worst performance no coupon is paid for one or more interest period(s), but the conditions for paying a coupon are met for a subsequent period, then investors will receive a coupon payment for this subsequent period as well as for all previous interest periods for which no coupon was paid.

(*) Indicative as of 12/01/2024

Payments due under the Notes are guaranteed by the Guarantor by a first demand guarantee governed by **French law (Paris Courts** having jurisdiction) without recourse to the Issuer.

3. SIGNIFICANT RISKS FOR INVESTORS

This section cannot disclose all the risks related to the Notes and must be read in conjunction with the risks set out under “Risk Factors” in the Base Prospectus (including, without limitation, general operational risks, conflicts of interests, and the risk that hedging and trading activities by the Issuer or the Guarantor (or any of their affiliates) may affect the value of the Notes) and the risk disclosure brochure “Risks Involved in Trading Financial Instruments” (Edition 2019), which is available for free on the Swiss Bankers Association’s website www.swissbanking.org/en/topics/information-for-private-clients/useful-information.

Structured products such as the Notes described in this document are complex and may involve a high risk of loss. The terms and conditions are indicative and may change with market fluctuations. Prior to investing in the product, investors should seek independent financial, tax, accounting and legal advice.

Credit risk: Investors take a credit risk on the Issuer, and ultimately on Société Générale as guarantor of the obligations of the Issuer in respect of the product according to the terms and conditions of the guarantee (available at the Guarantor’s office upon request). Thus Société Générale’s insolvency may result in the partial or total loss of the invested amount. The market value of the product can decrease significantly below its nominal value as a result of Société Générale’s creditworthiness.

Recourse limited to the Guarantor: By investing in this product investors acknowledge that they shall have no recourse against the Issuer in the event of a payment default by the Issuer with respect to any amount due under the product, i.e. no investor has the right to institute any proceeding or to otherwise assert a claim against the Issuer of the product to enforce the relevant payment under the product. However, this is without prejudice to the investors’ rights under the Guarantee of the Guarantor.

Bail-in : The Bank Recovery and Resolution Directive (BRRD) provides “Resolution Authorities” across the European Union with a comprehensive set of tools to deal with failing European financial institutions by using amongst other things the “bail-in”. If the Issuer and/or the Guarantor becomes subject to resolution measures in the form of bail-in, investor’s claim may be reduced to zero, converted into equity or its maturity may be postponed. This may result in losses on the invested amount, regardless of the capital protection of the product, if any.

No capital protection : For products which include a risk of capital loss, the redemption value of such products may be less than the amount initially invested. In a worst case scenario, investors could sustain the loss of their entire investment. Moreover, regardless the level of the capital protection, the investor may lose part or all of the initially invested amount before the maturity date, if the product is sold by the investor.

Events affecting the underlying instrument(s) or hedging transactions : In order to take into account the consequences of certain events affecting the underlying instrument(s) on the product or hedging transactions, the product’s documentation provides for (a) mechanisms to adjust or substitute underlying instrument(s), (b) the deduction of the increased cost of hedging from any due amount, (c) monetization and accordingly, de-indexation of the pay-off formula for all or part of the amounts payable under the product from the underlying instrument(s), and (d) the early redemption of the product by the Issuer. Any of these measures may result in losses on the product, regardless of the capital protection of the product, if any.

Currency exchange risk : When the underlying asset(s) is/are quoted and/or expressed in a foreign currency and/or, in the case of an index or an asset basket, it contains components expressed and/or quoted in one or several foreign currency(ies), the value of the investment may increase or decrease as a result of the value of such currency(ies) against the euro or any other currency in which the product is expressed, unless the product includes a currency exchange guarantee. Investors may be exposed to a further currency risk and the value of the Note may decrease or increase due to currency fluctuations if the Notes are denominated in a currency other than the currency of the country in which the investor is resident.

Market risk: the product may at any time be subject to significant price movement which may in certain cases lead to the loss of the entire amount invested. Certain products may include embedded leverage, which amplifies the variation, upwards or downwards, in the value of the underlying instrument(s), which may result, in a worst case scenario, in the partial or total loss of the invested amount.

Risk relating to unfavourable market conditions: The fluctuations in the marked-to-market value of certain products may require the investor to make provisions or resell the products in whole or in part before maturity, in order to enable the investor to comply with its contractual or regulatory obligations. As a consequence, the investor may have to liquidate these products under unfavourable market conditions, which may result in the partial or total loss of the invested amount. This risk will be even higher if these products include leverage.

Liquidity risk: This product entails a materially relevant liquidity risk. Certain exceptional market circumstances may have a negative effect on the liquidity of the product. The investor may not be able to sell the product easily or may have to sell it at a price that

significantly impacts how much he gets back, This may entail a partial or total loss of the invested amount.

Bid / offer spread: If Société Générale provides secondary market prices during the term of a product, there will be a difference between the bid and offer prices (spread), and this spread may decrease or increase during the term of the product.

Information in the event of a buy back by Société Générale or of an early termination of the product: Société Générale may commit to ensure a secondary market. The performance of this commitment shall depend on (i) general market conditions and (ii) the liquidity conditions of the underlying instrument(s) and, as the case may be, of any other hedging transactions. The price of such products (in particular, the “bid/offer” spread that Société Générale may propose for the repurchase or early termination of such products) will include, inter alia, the hedging and/or unwinding costs generated by such a buy back for Société Générale. Société Générale and/or its subsidiaries cannot assume any responsibility for such consequences and for their impact on the transactions relating to, or investment into, the relevant products.

Conflict of Interest: The valuation of a product may be linked to the spot price or the fixing of underlying financial instruments or other asset types (the “underlying assets”). At any time, Société Générale and its affiliates may trade in such underlying assets on own account or on behalf of their clients who may have similar or opposite interests to investor’s own, or act, without limitation, as derivatives counterparty, hedging party, issuer, market maker, broker, structurer, advisor, distributor, placing agent, guarantor, asset manager, custodian or calculation agent in relation to such underlying assets, which might have an impact on such underlying assets’ performance, liquidity or market value. Therefore, potential conflicts of interest may arise between the different divisions of Société Générale Group acting on such underlying assets on own account or on behalf of their clients, and investor’s own. However, conflicts of interest are identified, prevented and managed in accordance with Société Générale’s conflict of interest policy which summary has been communicated to the investor or is available upon request to his usual Société Générale contact.

Benchmarks: Investors in floating rate Notes and/or indexed on certain underlyings which are considered as benchmarks are exposed to the risk that : 1) such benchmarks may be subject to methodological or other changes which could affect their value, or 2) (i) may become not compliant with applicable laws and regulations (such as the Regulation (EU) No. 2016/1011 of the European Parliament and of the Council of 8 June 2016 (the Benchmarks Regulation)) ; (ii) may cease to be published, or (iii) the supervisor or administrator of any such benchmark may make a statement that the relevant benchmark is no longer representative, and as a consequence the relevant benchmark may be replaced by another benchmark.

U.S. Treasury regulations issued under Section 871(m) of the U.S. Internal Revenue Code of 1986 (Section 871(m) Regulations) generally impose a 30% withholding tax on dividend equivalents paid or deemed paid (within the meaning of the relevant Section 871(m) Regulations) to a non-United States holder (a **Non-U.S. Holder**) with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities (**U.S. Underlying Equities**). Specifically, Section 871(m) Regulations will generally apply to Notes issued on or after 1 January 2017 and that substantially replicate the economic performance of one or more U.S. Underlying Equity(ies) as determined by the Issuer on the date for such Notes as of which the expected delta of the product is determined by the Issuer based on tests in accordance with the applicable Section 871(m) Regulations (for the purposes of the relevant notices, such

Notes are deemed “delta-one” instruments) (**Specified Notes**). Notes linked to U.S. Underlying Equities which the Issuer has determined not to be a Specified Note will not be subject to withholding tax under Section 871(m) Regulations. If one or more of the U.S. Underlying Equities are expected to pay dividends during the term of the Specified Note, withholding generally will still be required even if the Specified Note does not provide for payments explicitly linked to dividends.

Investors are advised that in withholding this tax, the Issuer will regularly apply the general tax rate of 30% to the payments subject to U.S. provisions (or amounts deemed payments) without regard to any applicable treaty rate. Therefore, in such cases, an investor's individual tax situation will not be taken into account.

The applicable Final Terms will specify if the Notes are Specified Notes or Zero Estimated Dividends Securities. In the case of Notes that are Specified Notes, but not Zero Estimated Dividends Securities, the applicable Final Terms will specify whether the Issuer or its withholding agent will withhold tax under Section 871(m) Regulations and the rate of the withholding tax. In the case of Notes that are Zero Estimated Dividends Securities, the applicable Final Terms, will specify the rate of the withholding tax to be zero.

Investors are advised that the Issuer's determination is binding on all Non-U.S. Holders of the Notes, but it is not binding on the United States Internal Revenue Service (**IRS**) and the IRS may therefore disagree with the Issuer's determination.

The rules of Section 871(m) Regulations require complex calculations in respect of the instruments that include U.S. Underlying Equities and application of these rules to a specific issue of Notes may be uncertain. Consequently the IRS may determine they are to be applied even if the Issuer initially assumed the rules would not apply. There is a risk in such case that Noteholders are subject to withholding tax ex post.

As neither the Issuer nor the withholding agent will be required to gross up any amounts withheld in connection with a Specified Note, Noteholders will receive smaller payments in such case than they would have received without withholding tax being imposed.

Investors should consult their tax adviser regarding the potential application of Section 871(m) Regulations to their investment in the Notes.
